**THE NATHANIEL WHARTON FUND  
28<sup>TH</sup> ANNUAL RESEARCH DINNER**

**TIA POWELL, M.D.**

Despite being a physician and a bioethicist, Tia Powell wasn't prepared to address the challenges she faced when her grandmother and then her mother were diagnosed with dementia — not to mention confronting the hard truth that her own odds aren't great. In the U.S, 10,000 baby boomers turn 65 every day; by the time a person reaches 85, the chances of having dementia approach 50 percent. And the truth is, there is no cure, and none coming soon. Dr. Powell's goal is to move the conversation away from an exclusive focus on cure to a genuine appreciation of care — what we can do for those who have dementia, and how to keep life meaningful and even joyful.

*Dementia  
Reimagined:*

Building a Life of Joy and Dignity  
from Beginning to End
